Repita el paso para el lado izquierdo
Recommencer l'opération du côté gauche

3

Repeat step for LH side.
Repita el paso para el lado izquierdo
Recommencer l'opération du côté gauche

4

5

6

After removing cap use a 10mm socket to depress tabs (DO NOT ROTATE SOCKET). While tabs are depressed remove handle by pulling inward.

Luego de retirar la tapa, utilice un toma de 10 mm para presionar las lengüetas (NO GIRE EL TOMA). Mientras las lengüetas están presionadas, jale hacia adentro para retirar la manija.

Après avoir retiré le capuchon, utiliser une douille de 10 mm pour enfoncer les pattes (NE PAS FAIRE TOURNER LA DOUILLE). Lorsque les pattes sont enfoncées, déposer la poignée en tirant vers l'intérieur.

7

8

Repeat step for LH side.
Repita el paso para el lado izquierdo
Recommencer l'opération du côté gauche

9

Repeat step for LH side.
Repita el paso para el lado izquierdo
Recommencer l'opération du côté gauche

10

Route harness through instrument panel to driver side sill plate.

Enrute el arnés a través del panel de instrumentos hacia la placa de estribo del lado del conductor

Acheminer le faisceau à travers le tableau de bord jusqu'à la plaque de seuil du côté conducteur

11

Secure harness under driver side of instrument panel.

Asegure el arnés debajo del panel de instrumentos del lado del conductor

Fixer le faisceau sous le tableau de bord du côté conducteur

12

Secure harness under passenger side of instrument panel.

Asegure el arnés debajo del panel de instrumentos del lado del pasajero

Fixer le faisceau sous le tableau de bord du côté passager

13
